Class 1 Device Recall Boston Scientific WATCHMAN

Class 1 Device Recall Boston Scientific WATCHMAN

See Related Information[22]

Date Initiated by Firm	July 29, 2025
Date Posted	August 29, 2025
Recall Status[1]	Open[3], Classified
Recall Number	Z-2432-2025
Recall Event ID	97363[23]
510(K)Number	K180864[24]
Product Classification	Catheter, percutaneous[25] - **Product Code** DQY[26]
Product	WATCHMAN TruSeal Access System DBL, US, Material Number (UPN) M635TU70020; intended to provide vascular and transseptal access for all WATCHMAN Left Atrial Appendage Closure Devices with Delivery Systems.
Code Information	GTIN 08714729965718, ALL NON-EXPIRED BATCHES
Recalling Firm/ Manufacturer	Boston Scientific Corporation 1 Scimed Pl Maple Grove MN 55311-1565
For Additional Information Contact	Clara Johnson 763-494-1133
Manufacturer Reason for Recall	Boston Scientific has identified a higher likelihood of air embolism events when procedures are performed without positive pressure-controlled ventilation. According to published literature and clinical data, in percutaneous procedures requiring transseptal access to the left atrium when conscious or deep sedation is used, patients have an approximately three-times higher risk (U.S. study) of negative left atrium pressure and air ingress. This risk is especially prevalent in patients with pre-existing low left atrial pressure, hypovolemia, and partial upper airway collapse.
FDA Determined Cause [2]	Under Investigation by firm
Action	Boston Scientific issued an Important Medical Device Advisory notice to its consignees on 07/29/2025 via FedEx. The notice explained the problem with the device, procedures under which the likelihood of the problem occurs, and risk to the patient. The WATCHMAN Access Systems Instructions for Use (IFUs) and WATCHMAN physician training will be updated to emphasize instructions related to Access System air management. This update will strengthen the information provided to clinicians regarding the potential for air embolism during WATCHMAN procedures performed under conscious or deep sedation and provide potential mitigation strategies. No devices are being removed. Instructions: 1. Review IFU updates related to air embolism as detailed in Appendix 2. These updates

will be added to the WATCHMAN Access Systems IFUs and WATCHMAN Physician Training.
2. Forward this letter to any other clinicians in your medical facility who perform WATCHMAN procedures and to any facilities where affected devices have been transferred, including hospitals or sites within your network.
If you are a distributor, this notice must be forwarded to your customers to ensure notification of this Medical Device Advisory is carried out to the end-user level.
3. Complete and return the enclosed Acknowledgment Form.
If additional assistance is required or more information regarding this communication, customer should contact your local Boston Scientific representative or Sr. Quality Systems Manager at 763-494-1133.

Quantity in Commerce	340185 units in total
Distribution	Worldwide.
Total Product Life Cycle	TPLC Device Report[27]

[1] A record in this database is created when a firm initiates a correction or removal action. The record is updated if the FDA identifies a violation and classifies the action as a recall, and it is updated for a final time when the recall is terminated. Learn more about medical device recalls[28].
[2] Per FDA policy, recall cause determinations are subject to modification up to the point of termination of the recall.
[3] The manufacturer has initiated the recall and not all products have been corrected or removed. This record will be updated as the status changes.
